

NLP Quiz 10

NAME :

BID :

NOTE: Please have your writing readable (PRINT). Any unreadable content won't be regarded at the grader's discretion.

- 1 Given a pre-trained bert models, what does embedding mean? can you depict its dimensionality (0.5pt)? Name one difference between this "Bert" embedding and ti-idf. (0.5pt) Name one other embedding method other than these two (0.5pt).
- 2 According to the BPE encoding scheme, what's the minimal size of the vocabulary you could possibly construct? Answer it and provide short rationale (0.5pt)
- 3 Name 3 commonly used evaluation metric in NLP. For each metric, provide a concrete common NLP task that used that metric. (2pt)
- 4 Given a BPE encoding vocabulary, is the encoding procedure unique? why or why not? Given a word-level embedding vocabulary, is the encoding procedure unique? why or why not?) (1 pt each)
